Product Applications

The AD4113TFVW Dino-Lite Pro featurese both white and fluoresecent ultra-violet LED lighting in a single device. The option of viewing magnified objects under normal LED white light or fluoresecent ultra violet lighting by simply switching from one to the other. The new enhanced UV filtering system provides improved fluoresecence contrast- ing for use in forensics, biomedical or machine vision applications. The ability to switch from white light to fluorese- cent UV as well as on/off provides the user task flexibility and versatility. These two new models also come with calibrated measurement and all of the other standard features found in the Dino-Lite line of digital microscopes.

Ideal for scientific, medical and engineering research and inspection, as well as industrial quality control (parts inspection, failure analysis), dermatology (skin/scalp) exam, law enforcement (counterfeit ID, crime lab, CSI, etc). Simply use your imagination!

Included with each Dino-Lite digital microscope is a copy of the "DinoCapture" software, enabling you to "capture" either a photograph, video or time-lapsed video with a simple click!
