

Model : AM4116T Dino-Lite Premier VGA Dino-Lite for VGA Monitor

- Resolution: 640x480pixel
- Microtouch for LED on/off
- Output:D-SUB
- Power Adaptor: 5V

Product Description			
Product Number	AM4116T	Magnification	10X~50X, 200X
Warranty Period	1	Pixels	800x600pixels
Condition	New	Resolution	800x600pixels
Packaging	Retail Box	Data Output	D-SUB
Sensor	Enhanced Color CMOS	Video frame Rate	up to 30 frame-per-second
Illumination	Buit-in 8 white LEDs	Save File format	BMP, JPG, AVI
LED On/Off Function	Yes	Body length	4 inches / 10.2 cm
Body Diameter	1.26 inches / 3.2cm max.	Cable length	6 feet / 180 cm
Total package weight	280g +/- 20g		

Product Applications

Enjoy direct connection to your computer monitor with the AM4116T Dino-Lite Premier VGA microscope that can connect directly to your computer monitor via VGA (D-SUB) connection. It can view 60fps at 800x600 resolutions and has enhanced low light visibility so you can see clearly in any situation. microscope vga

With our unique patented design, the AM4116T can magnify objects up to 200x depending of working distance without changing a single lens. It also has a MicroTouch II sensor on the microscope so you can turn the built-in lights on or off. The AM4116T provides a versatile handheld microscope for your microscopy needs without a computer or a distracting television monitor. All you need other than the AM4116T is a computer monitor and your ready to go, providing low total system cost and focused use of our handheld microscope.

AM4116T uses the H11 housing which is the second generation housing for the Dino-Lite that incorporates: improved magnification dial movement for smooth and easy adjustment and focusing with the Dino-Lite, a scroll lock feature for assuring desired set magnification/ focus distance, and a cable strain relief (SR) that holds the Dino-Lite and its USB Cable together for greater resistance from pulls and twists.
