

Model : AM423X Dino-Eye

- Eyepiece Digital Microscope
- USB 2.0 Output
- 1.3M / Resolution 1280x 1024
- Body diameter: 23 mm
- Body length: 84 mm
- Aperature diameter: 23 / 30.0/ 30.5 mm

• AM423X with 30mm Adapter

• AM423X

• AM423X with eyepiece

• Education/Science Lab

• Printing

• Eye rabbit testis

Product Description

Product Number	AM423X	Magnification	none
Warranty Period	1	Pixels	1.3M
Condition	New	Resolution	1280x 1024
Packaging	Retail Box	Data Output	USB 2.0
Save File format	BMP, JPG, AVI	Video frame	Rate up to 30 frame-per-second
Sensor	1/3" Color CMOS	Aperature diameter	23 / 30.0/ 30.5 mm
Body diameter	23 mm	Body length	84 mm

Product Applications

The AM423X DinoEye digital eyepiece is uniquely designed to fit most eyepiece slots. Its housing is a 23mm diameter tube design. The eyepiece comes with 30mm, and 30.5mm diameter adapters. With the adapters and the freedom to slide the adapters on any point of the AM423X makes this model very universal.

The DinoEye digital eyepiece can help users upgrade their existing microscope, by replacing the eyepiece of a traditional microscope eyepiece with a 1.3 megapixel digital eyepiece.

You can use the AM423X digital eyepiece as a teaching tool, for digital imaging documentation, or simply use it for comfort on those long hours viewing into a microscope.

Included with each DinoEye digital eyepiece is a copy of the "DinoCapture" software, enabling you to "capture" either a photograph, video, or time-lapsed video within a few simple clicks.
